TSA LEAP LEADERSHIP RESUME – TEAM EVENT

(http://www.tsaweb.org/LEAP-competition-engagement)

TEAM IDENTIFICATION

Team ID: 2031
Competitive event: Webmaster
Level: High school

LEADERSHIP EXPERIENCES (specific to a competitive event)
- The captain is responsible for managing the website and developing the layout, as well as ensuring the other members complete their assigned work. (Be)
- Team members are required to meet all required deadlines, as well as deadlines within the chapter. This enables development of time management skills. (Be)
- Team members learn team-working skills in order to produce a cohesive and functional website. (Do)
- Team members are to utilize their knowledge of programming in languages such as CSS and HTML in order to develop a functional website. (Know)
- Programmers are responsible for the game coding, while the designers are responsible for research, outline, and context. (Be)
- The team members must build the site following the TSA guidelines, and addressing the prompt of following the laws of robotics in our development of a fictional artificial-intelligence robotics company. The fictional robot product of the company is a customizable educational tool to teach for schools, train for businesses, and recreational use. This enables the development of instruction-following skills. (Do)

LEADERSHIP EXPERIENCES (connected to one or more of these categories: *Leadership Roles; Community Service/Volunteer Experiences; Leadership Development/Training; College/Career Planning)*

Leadership Roles
- Team member currently acts as the art editor for our school's literary magazine. Skills developed in layout and art enables this member to develop a proper layout and attractive color scheme for the development of the website.
- Two of our members have computer science experience through their participation and leadership roles in the MAST Academy hacking team.
- Three of our members have held leadership positions in the MAST Academy eSports gaming club, enabling them to develop time management, and technology skills which can be applied to the development of the website.
